

MASTER PRECERTIFICATION LIST

For Health Care Providers

August 2023, Last updated August 7, 2023

Complete/PHS+ - The most comprehensive care management model that includes all the components of our Preferred level, plus additional digital tools and the highest level of engagement and potential savings.

Preferred - A comprehensive care management model that includes all the components of our existing care management model, including comprehensive outpatient precertification, plus higher intensity of care coordination and more customer engagement opportunities.

Basic Standard - A lower touch care management model that includes many of the components of our existing care management model, such as higher intensity of care coordination and more customer engagement opportunities. Basic Standard has a limited number of outpatient precertification categories (radiation therapy, medical oncology, medical injectables, home infusion therapy and private duty nursing), fewer than our Preferred and Complete solutions.

*Removal from precertification is not a guarantee of payment. Codes may be subject to code editing, benefit plan exclusions and post-service review for coverage.
